Anti-vibration Table VIT-1200

The anti-vibration table provides a maintenance-free solution for inverted microscopes used for ICSI, IMSI and embryos biopsy.

Key features:

- This independent anti-vibration table is designed and developed to meet the requirements of cell, gamete and embryo micromanipulation.
- Microscope platform separates from the desktop and isolates the unwanted vibrations from the desktop by using spring steel damping system to reduce the vibration from the environment.

Product Specifications

Dimensions	1200×800×780 mm (W×D×H)
Load	Up to 72kg
Tabletop material	stainless steel
